Health Technology Products CC

Health Technology Products CC, is a South African based company, founded in 1997. We are importers and distributors of Eco-friendly and economically-affordable health products and technologies.

The directors involved in H.T.P. cc is a husband and wife team consisting of Regis Lacomme a Frenchman by birth, who is an Engineer and is involved with Eco-tourism and Nature Conservation, while Marietjie Lacomme (South African citizen), has a background in Healthcare, the Healing arts and in Natural Medicines.

We have amongst our agents, people from different walks of life and all mostly with an interest and passion for the environment. It is with gratitude to these agents and network of distribution that we can now claim to have created a household name with some of our products.

We attend most Expo’s and Trade Shows as to bring awareness of our product range and source for possible entrepreneurs who would like to represent HTP in the local market. At the same time we educate the public about the environment, new innovative eco-friendly products, which are affordable and contributes to huge financial savings.

We supply to most Health shops and some Pharmacies. Our aim for 2009 is to penetrate the outdoor market and to supply to these retail stores.

Products are being manufactured in South Korea by the Swiss based company, EMKER SA LIMITED, and carries the CE marking.

We have up to date launched the product in South Africa, Namibia and Zimbabwe and soon Botswana, Mozambique and the rest of Southern Africa.
